

The Health Care Center at Royal Oaks

See reverse for Assisted Living Center information

The 125-bed licensed skilled nursing center offers exceptional long-term-care living to seniors requiring 24-hour nursing care or temporarily recuperating from a hospital stay. Semi-private and private rooms are available.

Located on our Sun City campus, the center also has Physical, Occupational and Speech Therapy on site. Patients requiring those services may not need to be transported to an off-site facility, making the recuperation process much less stressful.

Fifty three of the beds are in a secured Memory Care Wing, where the focus is progressive and palliative care, including sensory stimulation activities. A variety of cognitive and physical support exercises are part of daily life in this area and the nursing staff engages residents to share stories and talk about current events.

For resident comfort, eating options are plentiful, with four different dining rooms from which to choose, all of which invite residents to form social circles and encourage guests to visit.

Not only is the health care center a happy and tranquil place, it is also a well-respected medical facility utilizing an entirely electronic medical record system. This technology allows a higher level of caregiver interaction with patients and increases the quality of care.
